

Cloud strategy will maximize the benefits of cloud adoption : Robust and scalable infrastructure, reduced Total Cost of Ownership, faster Time To Market

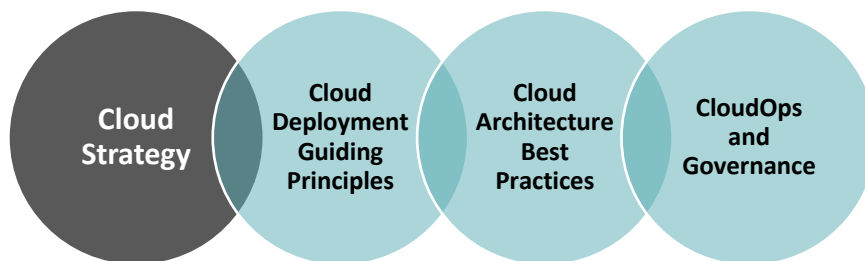

Cloud Strategy

You plan to migrate IT applications to the cloud and expecting more scalable infrastructure and more cost-effective operations.

However, you stumbled upon some critical questions :

- Which applications should move to cloud?
- Which CSP should you use, e.g. single or multiple cloud providers?
- How should cloud operations (incl. security) be governed and by whom?
- How to ensure robustness of cloud applications and at the same time make sure cloud cost is well managed (no bill shock)?

Our Cloud Strategy service we help you address critical aspects to successfully adopt and operate in the cloud

Contact us at sales@ked-consulting.com. We'd love to help you succeed!

Immediate Actions

1. Schedule a 60-mins meeting to tell us your Cloud story.
2. We will get back with a proposed approach in 1-2 weeks.
3. Conclude technical and commercial discussion.
4. Kick-off project.

We'd love to make the process lean so you can address current issues faster.

Migrating to the cloud without a proper cloud strategy is a recipe for failure, i.e., increased risks of business disruptions and unpredictable cloud spending
